

GPI launches New Global Search Engine giving users 3x the search: by language, by country, and by search engine!

WASHINGTON, DC, - April 21, 2009: Globalization Partners International (GPI), a provider of website, software and documentation [translation services](#) in over 100 languages, announced today that it has launched a [new search engine](#) for international business professionals, travelers, students, researchers and anyone else who needs to easily search the web by *language, by country, and by search engine*.

“Glearch stands for "Global Search" and is a tool for anyone who would like to perform searches by specific countries and [languages](#),” says Yasser Ahmed, Web Development Lead, GPI, “Glearch selects the top results from Google, Yahoo and MSN as well as the most popular search engines for a selected country and returns results.”

“Glearch started as an internal tool for GPI’s staff of translators, researchers, copy writers and global search engine specialists, as well as an answer to a common request from clients to find country specific information from hundreds of separate sources on the web,” said Martin Spethman, GPI’s Managing Partner. “Glearch’s global map-based interface and compilation of country specific facts, web resources, maps, newspapers and top sites bring users a wealth of information on one screen.”

Glearch is freely available and can be accessed at: www.glearch.com
